DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 53, 55 (in part), 56, and 57, drawn to a nucleic acid encoding a polypeptide comprising SEQ ID NO:2, classified in class 536, subclass 23.5.
- II. Claims 54 and 55 (in part), drawn to a nucleic acid comprising SEQ ID NO:1 or a portion thereof, classified in class 536, subclass 23.5.
- III. Claim 58, drawn to a method for producing an sGNK polypeptide, classified in class 435, subclass 69.1.
- IV. Claims 59-60, drawn to an sGNK polypeptide encoded by a nucleic acid of SEQ ID NO:1, classified in class 530, subclass 350.
- V. Claims 61-63, drawn to an isolated sGNK polypeptide comprising SEQ ID NO:2, classified in class 530, subclass 350.
- VI. Claims 64-66, drawn to a method of identifying a compound that modulates the interaction between an sGNK polypeptide and a GNK polypeptide, classified in class 435, subclass 7.1.
- VII. Claims 67-69, drawn to a vector comprising a nucleic acid similar to SEQ ID NO:3, classified in class 435
- VIII. Claim 70, drawn to a method of generating GNK-deficient cells, classified in class 435, subclass 325.
- IX. Claims 71-72, drawn to a nonhuman transgenic animal, classified in class 800, subclass 8.

Art Unit: 1642

- X. Claims 73-74, drawn to a cell from a nonhuman transgenic animal, classified in class 435, subclass 325.
- XI. Claims 75-77, drawn to antibodies which bind a polypeptide of SEQ ID NO:2, classified in class 530, subclass 387.1, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and III; V and VI; and VII and VIII are related as products and processes of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the nucleic acids of Group I can be used in the materially different process of diagnostic testing, the polypeptides of Group V can be used in the materially different process of affinity purification of antibodies, and the vector of Group VII can be used in the materially different process of protein synthesis.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and/or their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
